

Paper Roll Bird Feeder

A bird feeder is a device placed outdoors to supply bird food to birds (bird feeding). The success of a bird feeder in attracting birds depends upon its placement and the kinds of foods offered, as different species have different preferences.

Most bird feeders supply seeds or bird food, such as millet, sunflower (oil and striped), safflower, Niger seed, and rapeseed or canola seed to seed-eating birds.

Items Needed:

Sturdy used paper roll
Thin wire
Peanut butter
Bird seeds

Instructions:

1. Make two small holes (on opposite sides at the top of the paper roll, approx. 1/2 inch from the top)
2. Run a wire through the holes and connect to create a loop to hang the feeder from
3. Cover the paper roll with peanut butter and roll it in birdseed
4. Hang outside
